Don't work.  
**NETWORK!**

Every body wants to be a multi millionaire.

It is seen that the young people work a lot. They put all the hard work and slog to reach the sky. They become robots. Often, they do everything on their own even if they are not good at it.

That adds to the risk.

### **What is risk?**

Well, risk is something that is directly proportional to the knowledge you have of the subject.

People believe that they don't have the capital or cash to expand or start a new venture or a big idea.

Well, poor people slog and work for money. Rich people network for money.

I find it very amusing. If you study the big business empires in the world like Apple or Amazon, they didn't pump in their money to scale up. There was an investor.

OPM & OPT is the key if you want to build an empire.

### What is OPM, OPT?

OPM - Other's people money.

OPT - Other's people time.

It sounds cool and dreamy but it is as simple as it can get.

If you know how to get other people money, it will be pretty simple. For that, you need to invest on relationship and bonding with people. Along

with the money, talent comes free with network. And eventually your network is gonna decide your net worth.

But if you have to take money or time from somebody, you need to first give.

**The problem is that we all are in taking mood. Start giving first.**

Network to give. Give gratitude as much as possible. Easiest thing to give is respect and love. More respect and love you give, more would be the asset for future.

People are waiting to give money to you. But first be clear of why you need money. Be clear of why you doing what you are doing.

Today, most of the people follow the rat race. Why the rat race? Start a new race. Go for rabbit race. Big people change the race.

Look at Apple or Facebook. They didn't do anything new. There were already competitors. But **they just did things better, that synced with the masses.**

Leadership is not about selecting followers. Leadership is when people want to be your followers. And that can be done only using the language of love, language of growth and language of service.

So give out love. And money will come. That's what Chanakya says. Listen to the pain of the others, and money will come as bi-product.

People want to love something or the other. Money is loved. **The simple formula is - love people, network and make more money.**
